

Resolution on the EU-Ukraine Association Agreement

The European Movement International Federal Assembly welcomes the significant progress of Ukraine in the process leading to the EU-Ukraine Association Agreement.

We express our support for the European aspirations of the Ukrainian people. We do hope that the vision of membership will advance the transition reforms in Ukraine, as was the case for the Central and Southern European countries that joined the European Union in 2004 and 2007.

We call on the Ukrainian authorities to continue the process of modernization to bring the country closer to EU standards. We call upon the Ukrainian authorities to fulfill, as soon possible, the 3 criteria of this Agreement, namely:

- the compliance of the 2012 parliamentary elections with international standards and follow-up actions,
- addressing the issue of selective justice and preventing its recurrence,
- and implementing the reforms defined in the jointly agreed Association Agenda.

We do hope that Ukraine, having been successful on this path, will create the indispensable conditions to sign the association agreement with the European Union during the Eastern Partnership Summit in Vilnius in November 2013.
